Example 1: $43,000

$11925 × 0.10 = $1192.50
43000 - 11925 = $31,075 × 0.12 = $3729.00

Total tax = $1192.50 + $3729.00 = $4,921.50

Effective rate:
4921.50 / 43000 = 0.1145 = 11.45%

Example 2: $75,000

$11925 × 0.10 = $1192.50
48,475 - 11925 = $36,550 × 0.12 = $4386

75000 - 36550 - 11925 = 26525

$26525 × 0.22 = $5835.50

1192.5 + 4386 + 5835.50 = $11414

Effective rate:
11414 / 75000 = 0.1522 = 15.22%

Example 3: $115,000

11925 × 0.10 = $1192.50
48475 - 11925 = $36550 × 0.12 = $4386
103 350 - 48475 = $54875 × 0.22 = $12,072.50
115000 - 103350 = 11650 × 0.24 = $2796.00

1192.50 + 4386 + 12 072.50 + 2796.00 = $20447

Effective rate:
20447 / 115000 = 0.1778 = 17.78%
